_____

Choosing a warmed head Bathroom Faucets reduces the cost to heat water considerably. If you compare it to you current warm water heater, think about how it heats over 30 gallons water at a time while this unit heats only a few gallons on demand. This makes it a more efficient device to use in your home. For a classier and elegant option, you may want to try the Mira Escape 9.8KW Thermostatic Electric Shower Bathroom Accessories in Chrome for about $308.00 or the Mira Escape 9.8KW Thermostatic Electric Shower in Satin Chrome for about $286.00.
