�I did not have the option to say no, � India added, noting �collateral� often meant handing over damaging information about one�s family. �Saying no meant hurting my family or hurting my friends. And I wasn�t gonna do that. �

India also recalled the initiation ceremony into DOS where she was unknowingly branded with Raniere�s initials.

�We were told that it was a symbol of the elements and that this was gonna be a bonding experience, � she said explained. �And we were sleep-deprived. We were starved. We were coerced. �

India also spoke with People ahead of the upcoming STARZ documentary Seduced: Inside the NXIVM Cult and gave more disturbing details about that night in January 2016.

�I had two women holding my hands and my feet so I wouldn't convulse, � India told the magazine. �I remember the smell of flesh.

India�s famous mother helped blow the lid off NXIVM by going public in 2017 as she fought to �save her daughter.

�I was scared to death but it didn't matter if I was scared, Catherine told the magazine. I knew what I was up against. I knew nobody had dared to do what I was doing because this cult had financially ruined them.

India added, I can't describe in words how grateful I am for that. Because the truth is, I didn't see a future for myself when I was there. I was really kind of committed to being there forever, indefinitely.
