Twirl Version Gucci Watch with Innovative Bracelet

If you have paid close attention to Gucci fashion collection, then the twirl collection watch is not new to you. The collection contains 6 versions all together, including the latest one. Although it is in the same design like other precious versions, the watch is rather innovative in its bracelet detail. This Gucci with quartz movement watch crowns at 6 o□ clock. There are all together six sapphire crystals casting evenly over the watch case, each with glorious charming light. The watch features rotating case with GG engraved case back and jewelry clasp. The watch is water-resistant to 30 meters. The Swiss made one enjoys a 2-year warranty. Stainless steel case matches perfectly with stainless steel/black/clear acetate bracelet as well as black dial. At the first sight, I thought that the bracelet is a combination of two parallel black straps leaving the between empty. The transparent innovation is something that I have not expected. How do you like this one?
