Designer Wallets for the Distinguished!

While it’s the money in the wallet that places a man in the class where he belongs, one should not ignore the wallet itself. Designer wallets cost a bomb, but they definitely have value for the money. Most designer wallets not like watches like www.donysterling.com www.donysterling.co.uk www.donysterling.com/brands-99-b0-Anne+Klein.html www.donysterling.co.uk/brands-14-b0-Gold.html www.glitzstorm.com are made of patent leather.

A word of caution here, the shiny chrome leather won’t stay shiny long. It's better to go for the pebbled surface or the matte surface. These surfaces wear well. Again the monograms of designers look and stay better on the matte finish.While the three fold wallet is the most convenient type of wallet to carry in your pocket, it does not have enough surface to show. A two-fold wallet has more skin to show and has all the more class. If you are looking for classy wallets for men, check out the Fossil wallets for men. The designer watch company Fossil has a collection of exquisitely designed wallets for men that will be a cynosure of all eyes once you take it out of your pockets. They are all leather with bold stitches that convey an aura that states the owner of the wallet is someone whom you can trust and is worth his word.Travel WalletsInternational travel means that you need to carry your passport along with you. Often you are necessitated to carry your passport not only while crossing into a country but around the city too as it is the only document of identification. The size of a passport is small enough to be fitted into your pocket, but you would not like to carry a bare passport around in your pocket. That is why people end up carrying some bag containing important documents like the passport and airlines boarding pass, insurance, etc. Carrying the bag along is a bit of a bother and a lot of bother at rest rooms.To get you out of this predicament, wise people have come out with a travel wallet. What is a travel wallet? It is an oversized wallet that can accommodate a passport. Besides that it has the usual pockets for credit cards and cash. The size can accommodate the boarding pass too. The Bellroy Travel wallet is a wallet designed for this purpose. The designer wallets from Bellroy come with the added facility of having a small pocket to store microSD cards and mobile phone SIM cards. Another great facility it has is that the centerfold has a small sleeve in the leather to accommodate a small pen. This makes it easy to fill out those forms they hand you when you go to immigration desks.
