_____

Leslie�s new character Ryan Wilder will begin Batwoman Season 2 donning the same suit as Rose�s Kate Kane before debuting her new threads in the third episode, according to a press release issued by The CW.

The changes to Batwoman�s look include �a new cowl featuring natural, curly hair with red streaks, red gauntlets over the forearms, and shorter boots� and �a redesign with new materials, featuring laser etching to create more visual depth and a stronger silhouette. �

The redesigned suit was conceptualized by costume designer Maya Mani and created by Ocean Drive Leather, while overseen by series executive producer Caroline Dries. �I love the fact that Ryan is becoming her own Batwoman � it�s her style, her swag, and her moment! � Leslie said in a statement. �It was an honor to be able to collaborate with Caroline and Maya. I felt it was important that viewers could tell by the silhouette that Batwoman was a Black girl. With the form-fitting suit and beautiful Afro, we definitely nailed it! �

Reactions to Batwoman�s new look were largely positive on social media, including one from Leslie�s co-star Camrus Johnson. Based on the iconic DC Comics character and set in the same Arrowverse as The CW�s The Arrow, The Flash, Supergirl, Legends of Tomorrow, Black Lightning and the upcoming Superman & Lois, Batwoman premiered in Octotber 2019 with the out lesbian Rose playing the out lesbian Kane, a street fighter battling Gotham City�s criminal resurgence. The TV version of Kane was based on Batwoman�s 2006 reintroduction in the comics and made her the first gay lead character in a live-action superhero series.

After Rose announced she was leaving the show in 2020 � a mutual decision reached by Rose, the series and network that the actress later attributed to lingering effects from back surgery � the producers reaffirmed their commitment to casting another LGBTQ actress in the role.
